

ANNEX A TO HURRICANE PLAN
EVACUATION, DECISION AND RESPONSE TIME LINE

I. INTRODUCTION

A. General

The following Evacuation Decision/Response Timeline describes the major activities from initiation of response through post-reentry. Prior to a storm, times are expressed in “E Hour” format, which are the number of hours prior to beginning evacuation operations. These times are different than “H Hour” times shown in many plans and the post storm time line of this plan. H Hour is defined as arrival of tropical storm force winds, which in many instances is approximately two days after an evacuation has begun. The exact correlation between E Hour and H Hour differs by conglomerate and decisions made in how to execute a specific evacuation.

The SERT is expected to complete procedures outlined in their respective ESF SOP, the SCEOP, and the South Carolina Hurricane Plan Annex B, State Operating Conditions.

B. Purpose

The Timeline noted below assumes at least 72 hours before initiating evacuation to allow affected State, county, and municipal agencies sufficient time to prepare.

For situations with less than 72 hours preparation time, ESF actions must be compressed into the time available. Those actions noted below by an asterisk (*) require alternative procedures as noted.

C. Scope

Certain actions will be accomplished only for a response to a major (Category 3 or greater) hurricane.

Items in **BOLD** are time sensitive events/decisions whose delay will have a negative effect on successful execution of an evacuation.

| Evacuation Decision and Response Time Line | |
|------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Time Prior to Public Notification of an Evacuation | Operational Key Event, Decision Point, or Timing Window (timings are situation dependent) |
| OPCON 5 Day-to-day Operations | |
| Day-to-day Operations | <ul style="list-style-type: none"> ❑ SCEMD: <ul style="list-style-type: none"> • Monitor all Atlantic low pressure systems and tropical cyclones for potential threat to South Carolina. • Track National Hurricane Center’s (NHC) tropical cyclone forecasts utilizing hurricane tracking tools. • Update each forecast (as needed) thereafter until threat to South Carolina is over. • Notify key State partners of potential storm activity. ❑ South Carolina National Guard (SCNG): conduct critical equipment readiness and locate replacements for any non-operable equipment. Maintain PERSTAT (Personnel Status) based on deployments. |
| E-120 hours/5 days DHEC unique tasks associated with Federal Medical Support Requirements | <ul style="list-style-type: none"> ❑ ESF-8 <ul style="list-style-type: none"> • Healthcare facilities contact transportation providers for planning. • Inter-state EMAC assistance planning. • Coordinate additional transportation needs. |
| E-96 hours/4 days | <ul style="list-style-type: none"> ❑ SCEMD: Notify SC Department of Health and Environmental Control (SCDHEC) to alert healthcare facilities/nursing homes of potential evacuation timing. ❑ ESF-6: ARC coordinates with ARC National for personnel requests. ❑ ESF-8: <ul style="list-style-type: none"> • Initiate conference call for licensed health care facilities and their associations. Continue calls as necessary until evacuation. • Recommend census reduction measures for hospitals statewide. • Recommend healthcare facilities contact transportation providers for planning. • Inter-state EMAC assistance planning. • Coordinate additional transport needs. • Conduct initial coordination with FEMA reference implementation of NDMS Patient Evacuation Plan. |

| Evacuation Decision and Response Time Line | |
|------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Time Prior to Public Notification of an Evacuation | Operational Key Event, Decision Point, or Timing Window (timings are situation dependent) |
| OPCON 4 72 Hours Prior to Evacuation | |
| E- 72 Hours | <ul style="list-style-type: none"> ❑ SCEMD: <ul style="list-style-type: none"> • Initiate OPCON 4 activities as required. • Increase SEOC activation staffing as appropriate. • Activate the Emergency Operations Plans (EOP). • Notify ESFs and State agencies to initiate ESF SOP activities. • Assess storm forecast and potential state/regional impact using hurricane-tracking tools. • Advise key personnel and ESFs to begin preparation for possible mass evacuation; notify ESFs 1, 6, 8, 13, 15, 16, 17 and 19. • Brief Governor and staff after receipt of advisories, as required. ❑ Governor: Sign Governor’s State of Emergency Declaration to support disaster operations. ❑ SCEMD: <ul style="list-style-type: none"> • Submit request for a Presidential Pre-Disaster Declaration, direct federal assistance and category B emergency protective measures. • Conduct coastal county conference calls, as scheduled, to discuss advisories, Governor’s guidance and future actions. ❑ USGS: Deploy temporary river gauges to monitor possible inland flooding ❑ ESF-1: SCDOT - Notify districts, and reviews schedules and agreements. ❑ ESF-6: ARC verifies personnel requests with ARC National. ❑ ESF-8: <ul style="list-style-type: none"> • Initiate Ambulance contract for Mandatory Medical Evacuation as determined by need. • Mobilize and monitor Emergency Medical Services transport. • Monitor to ensure Healthcare facilities contact transportation providers for planning. • Monitor status of Ambulance contract, if requested. • Monitor Inter-state EMAC assistance planning. ❑ ESF-13: Issue notification to all officers to be on alert, ready to respond. ❑ ESF-15: Enhance public awareness campaign. ❑ ESF-16: Issue warning order to SC Highway Patrol (SCHP). ** If insufficient time to issue Warning Order, SCDPS may have to warn and deploy forces as trooper shift work dictates, and phase augmenting troopers to prioritized Traffic Control Points (TCP). May request State Law Enforcement Division (SLED) or SC Department of Natural Resources (SCDNR) assist with TCPs |

| Evacuation Decision and Response Time Line (continued) | |
|---------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Time Prior to Public Notification of an Evacuation | Operational Key Event, Decision Point, or Timing Window (timings are situation dependent) |
| OPCON 1 | 6 Hours Prior to Evacuation |
| E- 6 to E- 3 Hours | <ul style="list-style-type: none"> ❑ SCEMD: <ul style="list-style-type: none"> • Initiate OPCON 1 activities as required. • SEOC continues at Full Activation. • Activate PIPS and announce telephone number. • Assess storm forecast and potential state/regional impact using hurricane-tracking tools. • Assess post-landfall weather threats for flood and tornadoes. • Provide general weather forecast. • Brief Governor and staff after receipt of advisories, as required. ❑ Governor: Announce evacuation. ❑ Mass Transportation vehicles move to Motor Coach Forward Staging Areas ❑ SCEMD: 1st Evacuee bus departs; process continues until last bus departs or -2 hours to onset of tropical force winds. ❑ ESF-6: Update ARC National personnel requests. ❑ ESF-15: <ul style="list-style-type: none"> • Focus public information campaign specifically on evacuation information. • Re-issue news releases delineating vulnerable and evacuation areas. ❑ ESF-16: <ul style="list-style-type: none"> • SCHP - Occupy TCPs for traffic control. • Initiate Lane Reversal Clearance (if lane reversal ordered). ❑ ESF-17: <ul style="list-style-type: none"> • Provide information about shelter options to evacuating animal owners. • Coordinate resources to support possible emergency pet sheltering. ❑ ESF-19: Civil Support Team deploys as required. |
| E Hour | <ul style="list-style-type: none"> ❑ ESF-13: Security missions become operational. ** If National Guard is not activated for traffic reversal TCPs, Law Enforcement Personnel working security missions will be utilized on TCPs. Once reversal is complete, these officers will return to security missions. ❑ ESF-13/ESF-19: TCPs manned and prepared to control traffic. ❑ ESF-15: Broadcast Emergency Alert System (EAS) message. ❑ Beginning approximately 6 hours before arrival of Tropical Storm Force Winds, move to Shelter In Place locations. |

| Evacuation Monitoring | |
|-----------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Category 1 and 2 storms (lane reversal may not initially be implemented) | <ul style="list-style-type: none"> <input type="checkbox"/> ESF-16 monitors evacuation status and reports traffic flow (speed & counts, accidents, and critical intersections). <input type="checkbox"/> Initiate lane reversal, if required. |
| For each storm | <ul style="list-style-type: none"> <input type="checkbox"/> Evacuation status monitoring/reporting of <ul style="list-style-type: none"> • Shelters status (General Population and SMNS, ESF-6) • Status of medical facilities (ESF-8) • Media activities (ESF-15) • Traffic situation (ESF-16) • Hotel/motel availability (ESF-24) • Fuel Situation (ESF-12) • Mass Transportation Status (ESF-1/SCEMD) • Communications Status (ESF-2) • PIPS Inquires (SCEMD) |

Evacuation can take 44 hours or more, and will be followed by a period of time awaiting storm arrival which will be used by all individuals and organizations for final checks and preparation. Force protection is a primary focus. As landfall occurs, there is a period of hours for the storm itself to pass.

A continuous effort to remain in contact with affected areas by all means available, as well as monitoring the status and well-being of shelters, development of known logistical or resource requirements, and maintenance of communication by all sources highlight this time period. These efforts will focus on the preservation of life and property, as well as the determination of needs in the post-storm environment. Efforts to determine the magnitude of storm damage and the requirements of the support effort are early needs. Finally, through coordination with affected counties, the SEOC will coordinate public information and required resources for reentry based on county decisions and priorities.

| On Order | <ul style="list-style-type: none"> ❑ SCEMD: <ul style="list-style-type: none"> • Transition to reentry procedures. • Coordinate Post-Impact Refuel Plan for Emergency Responders ❑ ESF-1: Position signage (variable message boards, road markers) to facilitate reentry, as required. ❑ ESF-16: <ul style="list-style-type: none"> • Advise EMD Director on lane reversal options. • Monitor reentry traffic ❑ ESF-19: Deploy SCNG assets to support operations/communications. ❑ All: <ul style="list-style-type: none"> • Transition to JFO integration/support. • Support re-organization from Emergency Support Functions (ESF) to Recovery Support Functions (RSF) in conjunction with Federal partners. • Be prepared to demobilize and resume normal operations. |

III. REENTRY AND RECOVERY OPERATIONS

Once the Governor rescinds an evacuation order, reentry operations may begin. Reentry is the transition phase to recovery operations. The SEOC remains at OPGON 1 during reentry. Reentry is a local decision. At a minimum, the following areas/ESFs should consider and accomplish the listed items in the table below.

| REENTRY AND RECOVERY OPERATIONS | |
|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| RESPONSIBLE AGENCY/ESF/SECTION | ACTIONS |
| SCEMD | <p>Continue staffing SEOC with the following ESFs/Sections, as required:</p> <ul style="list-style-type: none"> ESF 1: Transportation ESF 2: Communications ESF 3: Public Works and Engineering ESF 4: Firefighting Planning Unit: Information and Planning ESF 6: Mass Care Resource Unit: Resource Support and Planning ESF 8: Health and Medical Services ESF 9: Search and Rescue ESF 10: Hazardous Materials ESF 11: Food Services ESF 12: Energy ESF 13: Law Enforcement ESF 16: Evacuation Traffic Management ESF 17: Animal/Agriculture Emergency Response ESF 18: Donated Goods and Volunteer Services ESF 19: Military Support ESF 24: Business and Industry <p>Ops:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Notify all counties of situation status. <input type="checkbox"/> Coordinate with Public Information (ESF-15) to broadcast bulletins about NWS advisories, restricted areas, and protective actions. <input type="checkbox"/> Deploy assistance teams as requested and as required. <p>Plans</p> <ul style="list-style-type: none"> <input type="checkbox"/> Prepare executive order rescinding evacuation order. Project reentry areas where applicable. <input type="checkbox"/> State Climatologist’s Office provides weather information as required. <p>Logistics</p> <ul style="list-style-type: none"> <input type="checkbox"/> Conduct staging area coordination. |
