**SOUTH CAROLINA OPERATIONAL RADIOLOGICAL EMERGENCY RESPONSE PLAN  
(SCORERP) FOR OFF-SITE OPERATIONS IN SUPPORT OF NUCLEAR POWER PLANTS  
BASIC PLAN  
APPENDIX 2--SOUTH CAROLINA EMERGENCY OPERATIONS PLAN**

---

**I. INTRODUCTION**

A. General

The South Carolina Operational Radiological Emergency Response Plan (SCORERP) provides for the guidance, coordination and utilization of state and other resources in support of affected county government(s) off-site operations during an emergency resulting from a radiological incident at Nuclear Power Plants (NPPs) in this or contiguous states. It is written in accordance with the planning standards contained in NUREG-0654, FEMA REP-1, REV. 1.

B. Purpose

This plan provides the framework and coordination for an effective radiological emergency response effort between federal, state and local government agencies and the private industry of Nuclear Power Plants (NPP), the purpose of which is to:

1. Protect the lives and property of citizens, and to reduce human suffering resulting from a potential NPP incident;
2. Coordinate and provide public warning, direction and control to citizens in the form of official statements (news releases) and Emergency Alert System (EAS) messages;
3. As required, support local government response operations with timely and effective deployment of state resources and the coordination of federal resources; and
4. Coordinate and direct restoration and recovery operations.

C. Scope

The SCORERP complements and is designed to interface with the South Carolina Emergency Operations Plan (SCEOP). Pre-planned response actions for each emergency classification level, as well as protective actions delineated herein are compatible with those of the SCEOP. The implementation of the protective actions and procedures prescribed in this plan provide reasonable assurance that the health and safety of the populace surrounding NPPs in or bordering South Carolina will be protected.

**II. SITUATION, FACTS AND ASSUMPTIONS**

A. Vulnerability Analysis

1. There are four (4) commercial Nuclear Power Plants and one (1) federal facility within the State of South Carolina in addition to facilities in adjacent states that could affect the State's territory and citizens. The four NPPs are Oconee Nuclear Station, H.B. Robinson Steam Electric Plant, V.C. Summer Nuclear Station, and Catawba Nuclear Station. The federal facility is the Department of Energy's Savannah River Site (SRS). NPPs in neighboring states are Vogtle Electric Generating Plant in Georgia, and Brunswick and McGuire Nuclear Stations in North Carolina.
2. The Nuclear Power Plants are located in four counties within South Carolina (Oconee, York, Fairfield, and Darlington). All but four of the state's counties fall within the 10-mile or 50-mile emergency-planning zone of at least one nuclear facility. These four counties are Beaufort, Berkeley, Charleston, and Georgetown.

**B. Hazard Analysis**

1. A radiological accident that can present an off-site hazard to residents and property can occur at one of South Carolina's Nuclear Power Plants, or at a facility in an adjacent state.
2. Any radiological accident that presents off-site radiological hazards could involve the jurisdictions of two or more local governments, and conceivably, the involvement of two or more states. Therefore, state and/or federal assistance will be required to provide the necessary direction, coordination, and support.

**C. Facts**

1. National

To ensure the maximum protection for people and property in proximity to Nuclear Power Plants, the Nuclear Regulatory Commission (NRC) requires that approved state and local government radiological emergency response plans exist in order for a Nuclear Power Plant to be operationally licensed or to continue operation. The NRC is responsible for radiological safety procedures within the confines of the facility (on-site). FEMA is the responsible federal agency for radiological emergency response procedures outside the facility (off-site).

2. State

In accordance with the planning guidance contained in NUREG 0654, each NPP 10-mile Emergency Planning Zone (EPZ) is further subdivided into protective action zones that are designed to facilitate notification and selective protective actions for residents and transients within those zones. Protective action zones are defined utilizing prominent physical features, either natural (rivers and lakes) or man-made (roads), to outline their boundaries. They are further defined by landmark descriptions that are readily recognized to area residents and permit

effective dissemination of information and guidance in the event of a radiological emergency requiring the implementation of protective actions.

### III. CONCEPT OF OPERATIONS

#### A. General

1. When in conformance with NUREG-0654/FEMA REP-1, Rev 1, radiological accidents can be categorized into one of four Emergency Classification Levels (ECLs).

These four ECLs are:

- a. Notification of Unusual Event (NUE).
- b. ALERT.
- c. Site Area Emergency (SAE).
- d. General Emergency (GE).

2. The ECL determines the degree of licensee, state, and local response as outlined in Attachment B. Off-site response will be determined by state and local officials with recommendations from State ESF 10 and/or the NPP.

#### B. Plan Activation

1. Emergency Phase

Emergency response begins when an ECL is determined by the NPP. It ends when the NPP situation has stabilized and there is no further potential for radioactive release offsite. The following operational concepts apply:

- a. Initial determination of each ECL is made by plant personnel based on parameters established in emergency action level classification procedures. Once the ECL is determined, the NPP will, within 15 minutes, provide emergency notification to the state and county warning points.
- b. South Carolina Emergency Management Division (SCEMD) will consider activating the State Emergency Operations Center (SEOC) when an ALERT ECL has been received and confirmed by State ESF 10. Risk counties will consider activating their EOCs at the ALERT ECL. "Host" counties will activate their EOCs as needed or upon request of affected Risk counties or SCEMD.
- c. The state's response to an incident at an NPP and coordination with other state, federal and local agencies will be directed by the Governor or his/her designee, normally the Director of SCEMD. County direction and control is provided by the chief elected official and/or the county

emergency management director or other designated county official in accordance with established plans and/or procedures.

- d. In the event of an immediate Site Area Emergency or General Emergency where the SEOC is not yet operational, local government may activate the public alert system in the 10-mile EPZ (fixed or mobile sirens and/or electronic tone alert radios) and broadcast notification information via the Emergency Alert Systems (EAS). If the immediacy of the emergency is such that there is insufficient time for State ESF 10 to confirm plant protective action recommendations (PARs), designated county officials will implement NPP recommended PARs without review and direction from the Governor or SCEMD Director.
- e. State and local governments will activate their Radiological Emergency Response (RER) plan as warranted by the ECL and in accordance with Attachment B.
- f. As warranted by the ECL, State ESF 10 will continually assess the gravity of the situation by evaluation of reported radiological release data from the impacted NPP, analysis of field environmental sampling data, and consultation with the NRC. Based on dose assessment data and/or the potential for plant conditions to further deteriorate, State ESF 10 will provide PARs to the Governor or the Director of SCEMD. PARs will, in turn, be coordinated with each impacted county to obtain consensus. Once all in the decision making chain are in agreement, Protective Actions will be established by SCEMD and executed in accordance with procedures contained in the NPP Site Specific plans.

2. Alert and Notification

- a. Procedures to alert federal, state and local government agencies are contained in Annex 1.
- b. Residents of each 10-Mile EPZ will be alerted of an NPP incident by a combination of fixed and mobile sirens and/or tone alert radios. When protective actions are recommended, clear and concise notifications to include evacuation zones and zones where in-place sheltering is required, will be promptly disseminated via the EAS. In the event that protective actions are not recommended, siren systems and EAS may be activated at any ECL to advise the public of plant emergency conditions.
- c. The decision to activate siren systems and the EAS will be made by the SEOC Chief of Operations in coordination with impacted counties. Once the decision is made, the SEOC FNF Section Manager or Situation Unit Leader will coordinate siren sounding and EAS activation by participating radio stations. Sample EAS messages are found in Annex 3, Attachment B.

- d. To ensure public understanding of emergency protective action instructions, the SCEMD Public Information Officer will publish and transmit, promptly upon completion of EAS message broadcast, a follow-on emergency news release to participating media stations and the South Carolina Educational Television Network (SCETV) that will contain familiar landmark descriptions of all zones where protective actions are required. Descriptions of familiar landmarks throughout each 10-mile EPZ protective action zone are contained in Site Specific Plans. Sample news releases are found in Annex 3, Attachment C.
  - e. Public Information (Annex 3).
3. SEOC
- a. The SEOC will be established and directed by SCEMD. The SEOC will coordinate the off-site RER activities of state agencies, local governments, federal agencies and contiguous states.
  - b. The SEOC will maintain communications with contiguous states and DHS FEMA, Region IV.
  - c. The SEOC will be activated in a timely manner, and will be capable of protracted operations. Staffing will be in accordance with the SEOC SOP and Site Specific Plans.
  - d. The SEOC will continue operation until the emergency is terminated or until recovery efforts have advanced to the point that direct state coordination is no longer required at the scene.
  - e. The SEOC Operating Condition (OPCON) level will be determined by the SCEMD Director as described in the SCEOP, Basic Plan.
4. Evacuation
- a. The South Carolina Department of Public Safety (DPS) will coordinate evacuation operations under the direction of ESF 16 (Emergency Traffic Management) as delineated in Annex 16 of the SCEOP.
  - b. In the event conditions at a Nuclear Power Plant degrade to the point that an evacuation of all or a portion of a 10-mile EPZ is required, the Governor will issue an Evacuation Order based on the technical assessment of plant conditions by ESF 10 and the recommendations of the SEOC Chief of Operations.
  - c. Upon notification that a gubernatorial evacuation order has been issued, affected counties will initiate local evacuation procedures as outlined in each county emergency operations plan and in Site Specific annexes to this document.

- d. If circumstances warrant, due to rapid and substantial degradation of the level of safety at a nuclear plant, immediate evacuation may be recommended by county officials.
  - e. Evacuation will be conducted over pre-designated routes to reception centers and shelters located at least 15 miles beyond the nuclear plant. Copies of materials to be used in directing evacuation (e.g., maps showing evacuation zones, evacuation routes, reception centers and shelters, etc.) are distributed annually by the plant to all residents of each 10-mile EPZ and are included in each "Risk" county EOP and Site Specific annexes to this document.
  - f. At Site Area Emergency, or as directed by the SEOC Chief of Operations, ESF 16 (SCHP), in coordination with local law enforcement agencies, will occupy Traffic Control Points (TCPs) designated in respective site specific plans; and in cooperation with the Department of Natural Resources, coordinate the clearance of all lakes and waterways within the 10-mile EPZ, and establish 2-mile road blocks from the NPP to restrict access to the facility either by road or water. Access to the NPP will be granted only to bonafide facility employees, emergency workers and government officials e.g., (representatives of the NRC).
  - g. Evacuation time studies for each 10-mile EPZ have been prepared by the various NPPs and are a part of the individual NPP emergency plan. Portions of these studies e.g., (population densities, evacuation times and route capacities) have been excerpted from NPP emergency evacuation plans and are included in County EOPs or Site Specific annexes to this document.
5. Transportation
- a. The South Carolina Department of Transportation (DOT) will coordinate transportation support operations under the direction of ESF 1 (Transportation) as delineated in Annex 1 of the SCEOP.
  - b. Emergency transportation services are the primary responsibility of the affected county. County procedures and the means for the evacuation of residents who may be immobilized through institutional confinement or other factors are contained in county EOPs.
6. Law Enforcement
- a. ESF-13 will coordinate general law enforcement activities, including but not limited to: providing security for all evacuated areas, shelters and reception centers.
  - b. During recovery operations, State Law Enforcement Division (SLED), in cooperation with all state and local law enforcement agencies, State ESF 10, and the State Department of Agriculture, will develop and implement

plans for maintaining access control to all evacuated areas and for permanent or long-term access control to remaining restricted areas, (See SCORERP, Annex 7). In further support of recovery operations, SLED will assist with the development and implementation of plans to embargo or restrict transportation of contaminated food products and will assist special groups such as farmers, or other individuals performing missions involving maintenance and disposition of livestock and food products.

7. Radiological Monitoring/Exposure Control
  - a. ESF 10 (Hazardous Materials) will coordinate radiological monitoring operations as delineated in Annex 10 of the SCEOP.
  - b. ESF 10 will deploy two radiological monitoring field teams with equipment and the expertise necessary to detect and measure airborne radiation and radioactive particulate depositions on the ground. Field data gathered will be compared with information and recommendations from the NPP to locate the radioactive plume and project or determine potential dose to the general public and emergency workers.
  - c. Based on comparisons of projected or actual dose measured and EPA protective action guidance (SCORERP, Annex 6), ESF 10 will promptly recommend to SCEMD and State government decision makers protective actions to shelter or evacuate the population and to commence monitoring and decontamination activities for evacuees.
  - d. Protective action recommendations may include an order for emergency workers, mobility-impaired populations\*, or the general public being evacuated to ingest KI. ESF-8 in consultation with a designated DHEC physician will obtain a written order for distribution to the counties. Nothing herein is intended to supersede the authority of counties or state agencies to distribute KI to their own emergency workers. (\*"Mobility-impaired populations" includes institutionalized populations which cannot be evacuated before plume exposure.).
  - e. The SEOC will provide incident assessment and dose projection information to affected counties and State RER agencies. County emergency management directors and State RER agency chiefs are responsible for monitoring the exposures received by their respective emergency workers and for ensuring that exposures do not exceed dose limits as specified in SCORERP, Table B, Annex 6.
  - f. All 10-mile EPZ emergency workers, or emergency worker teams, will be provided personal dosimetry, i.e., Self-Reading Dosimeters (SRDs), Permanent Record Dosimeters (PRDs) and the thyroid-blocking agent, Potassium Iodide (KI) prior to leaving the designated assembly area. Emergency workers will periodically read and maintain a record of individual radiation exposures in accordance with the procedures outlined in SCORERP, Annex 6, Attachment D.

- c. Radio Officers and Radio Operators from supporting commissions, agencies and departments remain under direct control of their own office when operating and maintaining state-owned equipment in any facility outside the SEOC. Within the SEOC, radio operators will report to the State Warning Point manager or the Chief of Operations in his/her absence.
- d. Telephone is the primary means of communications between mobile and fixed locations. During the initial phase of the disaster cellular telephones will be used extensively by forward deployed units and personnel. Every agency must ensure that they have adequate mobile telephone resources to support their communications for the first 72-hours of any event. Subsequent operations may be conducted from fixed telephone devices once service has been established at required forward locations. In the event that telephone communications fail, SCEMD Local Government Radio (LGR), the Palmetto 800 system, or other available radiotelephone networks will be used as the backup system until reliable telecommunications are restored.
- e. Radio procedures will conform to established FCC regulations and licensure for operating that particular base or mobile radio station. All communications over LGR and/or 800 MHz will be in "plain language" or "clear text."
- f. On-site communications activities will be controlled by the NPP Emergency Coordinator or his designated assistant. Communication will be maintained between the NPP Technical Support Center/Emergency Operations Facility (TSC/EOF) and state government by the following means:
  - 1). Existing and specially installed telephones in the SEOC/State Warning Point.
  - 2). Each NPP will have a radio and antenna installed to operate on the SCEMD frequencies. This radio will provide backup communication with the SEOC, and affected counties.
- g. State communications systems that are available at the SEOC/SWP:
  - 1). SCEMD Lowband VHF LGR Network.
  - 2). SCDPS/Highway Patrol 800 MHz Radio Network.
  - 3). Civil Air Patrol Highband VHF Radio Network.
  - 4). SCDNR Highband VHF Radio Network.
  - 5). Civil Air Patrol High Frequency (HF) Radio Network.
  - 6). Forestry Highband VHF Radio Network.

- 7). Radio Amateur Civil Emergency Services (RACES) (HF SSB and Two Meters) Radio Network.
  - 8). SLED Highband VHF Radio Network.
  - 9). SLED Regional Radio network.
  - 10). Palmetto 800 MHz Trunk Radio (SCANA).
  - 11). Satellite Phones
- h. Communications between primary RER agencies are also possible on permanently installed SCEMD LGR and 800MHz radios and satellite radiotelephones in SCEMD vehicles.
- i. Communications with North Carolina and Georgia are possible through the following means:
- 1). The FEMA National Radio System (FNARS) has terminals installed in the State EOCs of North and South Carolina and Georgia. This radio system provides voice or teletype communication between the three state governments.
  - 2). The National Warning System (NAWAS) has terminals located at the "Warning Points" and at the EOCs of Georgia, North Carolina and South Carolina.
  - 3). The Catawba Nuclear Station Decision Line has terminals in the North Carolina EOC.
  - 4). The Vogtle/SRS Emergency Notification Network (ENN) has terminals in the SEOC, GEMA EOC, and GEMA FEOC.
  - 5). Commercial, satellite and cellular telephones.
- j. During an NPP incident, communications with Federal Response Organizations will be conducted over the following systems:
- 1). Commercial telephone.
  - 2). FNARS.
  - 3). South Carolina can communicate directly with the Department of Energy in Aiken, SC, by State NAWAS and SCEMD LGR Network.

11. Ingestion Exposure Pathway

- a. The Ingestion Exposure Pathway Emergency Planning Zone (IPZ) is the area within an approximate 50-mile radius centered on the Nuclear Power Plant.

Implementation of protective actions by the public and agricultural community within the IPZ typically begins during the emergency phase of off-site response operations, with precautionary protective action for livestock and dairy cattle, and may continue well into the recovery phase.

- b. IPZ protective actions during the recovery phase will be determined and recommended by ESF 10 in coordination with South Carolina Department of Agriculture (SCDA), Clemson University Cooperative Extension Services and other concerned agencies. Protective Action Recommendations (PARs) will be based on the analysis of field samples of air, soil, milk, water and vegetation within the 10-mile EPZ. Environmental sampling outside the 10-mile EPZ will be directed at determining limits of the area of radiological impact (i.e., the "Plume") and determining the level of contamination of food, milk and water within, and adjacent to the plume area. Specific information on IPZ responsibilities, environmental sampling procedures, PAR determination and implementation procedures may be found in Basic Plan, Annex 7 and the South Carolina Technical Radiological Emergency Response Plan (SCTRERP).

## 12. Post-Accident Recovery

- a. Post-accident recovery includes re-entry, return and relocation. The state, local and federal governments will jointly develop a recovery plan for the accident.
- b. The decision to initiate these plans will be made upon recommendations from ESF 10 after consultation with representatives from the Nuclear Regulatory Commission (NRC), Environmental Protection Agency (EPA), and the utility. The basis for these decisions is found in Basic Plan, Annex 7 and SCTRERP.
- c. ESF 10 will advise SCEMD when return or re-entry can be initiated for specific evacuated areas. SCEMD will then recommend to the Governor the date and times these phases should begin. With the Governor's concurrence, SCEMD will notify RER organizations and local governments to proceed with return and re-entry.
- d. ESF 10 will advise SCEMD of those areas that are highly contaminated and which require evacuees from those areas to be relocated, either temporarily or permanently. State and federal assistance will be provided to locate temporary or permanent housing for these individuals.
- e. Operations will be directed from the SEOC. ESF 10 will continue to provide technical recommendations and accident assessments until the recovery phase is terminated. Close coordination will be maintained with local governments throughout the post-accident recovery. The federal government will provide non-technical assistance from the nearby Federal Response Center and technical assistance from the Federal Radiological Monitoring and Assessment Center.
- f. Public information plays a vital role throughout the recovery process. Extensive public information will be disseminated by various media to provide recovery

instructions, to include, but not limited to, decontaminating foodstuffs, caring for livestock, and personal precautions.

- g. See Annex B, South Carolina Emergency Recovery Plan for specific recovery procedures.

C. National Incident Management System (NIMS)

This plan supports the National Incident Management System (NIMS), which is a nationwide template enabling federal, state, local and tribal governments, as well as private sector and non-governmental organizations to work together effectively and efficiently to prevent, prepare for, respond to, and recover from domestic incidents regardless of cause, size, or complexity. First responders in all organizations are encouraged to implement the training in everyday use of a standardized, on scene emergency management construct specifically designed to provide for the adoption of an integrated organizational structure that reflects the complexity and demands of single or multiple incidents, without being hindered by jurisdictional boundaries. This system is known as the Incident Command System (ICS). ICS is the combination of facilities, equipment, personnel, procedures and communications operating with a common organizational structure, designed to aid in the management of resources during incidents. ICS is used for all kinds of emergencies and is applicable to small as well as large and complex incidents.

D. Operational Area Model

See Site Specific Plans 1-6.

E. County Actions

1. See SCEOP, Basic Plan.
2. See SCORERP Site Specific Plan, Parts 1-6, for each NPP's Site Plan.
3. See County EOP, Basic Plan; Annex Q and local County SOP.

F. State Actions

1. See SCEOP, Basic Plan.
2. See SCORERP, Basic Plan, para V Organization and Assignment of Responsibilities; and Annex 7.
3. See DHEC's SC Technical Radiological Emergency Response Plan (SCTRERP)

G. Federal Actions

1. See NUREG 0654/FEMA REP-1, Rev 1.
2. See NRP and FRERP.

#### IV. DISASTER INTELLIGENCE AND COMMUNICATIONS

See Disaster Intelligence and Communications section in the South Carolina Emergency Operations Plan (SCEOP).

#### V. ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITIES

##### A. State

1. The South Carolina Emergency Management Division (SCEMD) is the lead state agency for coordinating the state's offsite response to an incident at an NPP. SCEMD is responsible for coordinating state government activities with those of affected local governments, other states and federal agencies as appropriate.
2. The Department of Health and Environmental Control (DHEC), ESF 10, is the lead state radiation emergency response agency and will be involved in virtually all state NPP emergencies, regardless of severity, due to its assigned responsibility and the probable requirements for special techniques, equipment and technically trained personnel.
3. Detailed information on SCEMD, DHEC and the state organization for emergency response may also be found in the SCTRERP, and in the SCEOP. (See Attachment A, RER Organizational Chart)
4. State agencies and their radiological emergency responsibilities:
  - a. Emergency Management Division
    - 1). Prepare and maintain State Operational RER plans and procedures for state areas that can be affected by an NPP in South Carolina, Georgia, and North Carolina.
    - 2). Assist local governments in preparing and maintaining local RER plans.
    - 3). Prepare and maintain Site Specific Plans for each NPP in the state.
    - 4). Establish and direct the SEOC on a 24-hour basis.
    - 5). Coordinate off-site support from state, federal, and other support agencies in accordance with appropriate annexes to this plan and the SCEOP.
    - 6). Coordinate protective actions ordered by the Governor, to include evacuation as well as recovery/re-entry in coordination with ESF 10.
    - 7). Provide for a 24-hour notification system with the licensee, the State Emergency Response Team (SERT), and affected counties.

- 8). Maintain communication with DHS FEMA, Region IV and contiguous states.
  - 9). Recommend protective action measures to affected counties in coordination with ESF 10.
  - 10). Maintain and coordinate the SC Dosimetry Redistribution Plan.
  - 11). Coordinate with ESF 10 for the RER training of state and local government personnel.
  - 12). Coordinate with ESF 10 and the NPP to schedule pre-exercise meetings and develop NPP exercise scenarios.
  - 13). Conduct RER drills and exercises as specified in NUREG-0654, FEMA REP-1, REV. 1 and State Regulations 58-1 and 58-101, SC Code of Regulations.
  - 14). Maintain close liaison with each nuclear facility to assure that RER procedures are compatible.
  - 15). Schedule/coordinate federal RER courses for state and local RER personnel.
  - 16). Coordinate and conduct evaluation critiques for each NPP exercise.
  - 17). Secure and maintain appropriate letters of agreement.
  - 18). Operate and maintain the SCEMD Local Government Radio (LGR) network.
  - 19). Provide SCEMD LGR radios to counties in the 10-Mile EPZ, the Joint Information Center, and the NPP within resource limits.
  - 20). Provide communications coordination for radio nets at the SEOC.
  - 21). Provide annual training and/or information briefings for news media, including state and local Public Information Officers (PIOs), that will acquaint them with the Joint Information System (JIS), state and local RER plans, media communications, and measures to protect the public against radiation exposure.
  - 22). Assist Office of the Governor with direction and control of Public Information Services.
- b. ESF 1--Transportation Services

See SCEOP, Annex 1. Additional radiological emergency preparedness responsibilities include:

- 1). Notify railroads operating in the 10-mile EPZ of an NPP incident.
  - 2). Notify Federal Aviation Administration (FAA) of an NPP incident.
  - 3). Augment the Public Information Organization, as required.
- c. ESF 2--Communications
- See SCEOP, Annex 2 for responsibilities.
- d. ESF 3--Public Works and Engineering
- See SCEOP, Annex 3 for responsibilities.
- e. ESF 4--Firefighting
- See SCEOP, Annex 4. Additional radiological emergency preparedness responsibilities include:
- 1). Provide representatives to SEOC.
  - 2). Assist in decontamination in coordination with ESF 10.
  - 3). Maintain radio contact with all Forestry Commission elements in affected counties.
  - 4). Augment the Public Information Organization, as required.
- f. ESF 6--Mass Care
- See SCEOP, Annex 6. Additional radiological emergency preparedness responsibilities include:
- 1). Provide, in coordination with impacted counties, Department of Social Services and the American Red Cross, reception centers and shelters that are at least 5 miles beyond the boundaries of each NPP plume exposure emergency planning zone.
  - 2). Provide a uniform procedure for registration of evacuees at all relocation centers/shelters.
  - 3). Conduct annual training for all NPP relocation center/shelter workers to include shelter manager, and/or DSS shelter support personnel.
  - 4). Coordinate Reception Center and Shelter operations.
  - 5). Coordinate all Mass Care Services (MCS) activities.
  - 6). Coordinate Security for Reception Centers and Shelters.

- 7). Maintain a list of all child care facilities within the 10-mile plume exposure pathway EPZ of each Fixed Nuclear Facility (FNF). Verify that each center has radiological emergency evacuation plans, and provide them with training and technical assistance as needed.
- 8). Provide representatives at SEOC.
- 9). Augment the Public Information Organization, as required.
- g. ESF 7--Resource Support  
See SCEOP, Annex 7 for responsibilities.
- h. ESF 8--Health and Medical Services  
See SCEOP, Annex 8. Additional radiological emergency preparedness responsibilities include:
  - 1). Coordinate local and backup hospital and medical services having the capability for evaluation of radiation exposure and uptake, including assurance that persons providing these services are adequately prepared to handle contaminated individuals.
  - 2). Coordinate the transport of victims of radiological accidents to medical support facilities.
  - 3). Coordinate with ESF 10 the distribution of Potassium Iodide (KI) to the general population residing within 10 miles of each NPP, radiological emergency workers and those persons unable to evacuate promptly.
  - 4). Maintain statewide list of Emergency Medical Services (EMS) and rescue squads.
  - 5). Maintain letters of agreement with hospitals and their capabilities.
  - 6). Maintain a current list of statewide hospitals that will treat contaminated injured individuals.
- i. ESF 9 - Search and Rescue  
See SCEOP, Annex 9 for responsibilities.
- j. ESF 10 - Hazardous Materials  
See SCEOP, Annex 10. Additional radiological emergency preparedness responsibilities include:
  - 1). Maintain a radiological hazard dose assessment capability and provide radiological technical support, coordination and guidance

for the state. Prepare and update the supporting SC Technical Radiological Emergency Response Plan (SCTRERP).

- 2). Maintain a forward staging area for mobile laboratory and field team operations.
- 3). Provide for a 24-hour accident notification system with SCEMD.
- 4). Provide protective action recommendations (PARs).
- 5). Provide one representative at the affected NPP during exercises and actual incidents.
- 6). Provide one technical liaison for each risk and host county. The County Director will decide where the liaison will be assigned in the county. This is a SEOC/ESF-10 technical liaison position intended to provide guidance to the County; not to supplement county staff personnel.
- 7). Obtain and coordinate, under prearranged agreements, radiological assistance resources from the federal government, other states and the nuclear industry as necessary through EMAC, FRMAC and SMRAP.
- 8). Direct radiological monitoring efforts in the 10-Mile EPZ and the 50-Mile IPZ.
- 9). Provide regulatory oversight of decontamination and RAD waste disposal procedures.
- 10). Provide water supply and milk information required for sampling and monitoring. Respond to radioactive waterborne releases that threaten public water supply.
- 11). Recommend distribution/administration of KI; coordinate with ESF 8 the distribution to the general population residing within 10 miles of each NPP, radiological emergency workers and those persons unable to evacuate promptly.
- 12). Maintain and provide operators for DHEC communications equipment.
- 13). Provide radiological monitoring training to technical personnel. Instructions will include radiation protection, survey procedures, operation of survey instruments, review of state, local, and licensee RER plans, reporting requirements, and communications procedures. Specific training on dose calculations/projections, protective action guides, and reporting procedures will be provided.

- 14). Provide basic radiological emergency response training to Emergency Response Teams (ERTs) and agencies of state and local governments as requested.
  - 15). Participate in training programs conducted by NPPs for radiological monitoring teams, as requested.
  - 16). Maintain current information on agriculture, livestock, and dairy production in each 50-mile IPZ.
  - 17). Coordinate the state IPZ response (see Basic Plan, Annex 7).
  - 18). See SCTRERP for additional technical responsibilities.
- k. ESF 11--Food Services  
See SCEOP, Annex 11 for responsibilities.
- l. ESF 12--Energy  
See SCEOP, Annex 12 for responsibilities.
- m. ESF 13--Law Enforcement  
See SCEOP, Annex 13. Additional radiological emergency preparedness responsibilities include:
- 1). Identify state law enforcement personnel who may be called on to serve as radiological emergency workers during an NPP incident.
  - 2). Coordinate clearance and security of NPP, waterways, and forests.
  - 3). Coordinate access and security for evacuated areas.
- n. ESF 15--Public Information.  
See SCEOP, Annex 15 for responsibilities.
- o. ESF 16--Emergency Traffic Management  
See SCEOP, Annex 16. Additional radiological emergency preparedness responsibilities include:
- 1). Provide state traffic control points as deemed necessary in the 10-mile EPZ.
  - 2). Coordinate the rapid movement of dosimetry and radiological monitoring equipment to impacted areas requiring reinforcement.

- p. ESF 17--Animal/Agriculture Emergency Response  
See SCEOP, Annex 17 for responsibilities.
- q. ESF 18--Donated Goods and Volunteer Services  
See SCEOP, Annex 18 for responsibilities.
- r. ESF 19--Military Support
  - 1). See SCEOP, Annex 19. Additional radiological emergency preparedness responsibilities include:
  - 2). Provide SCNG armories, if available, to support ESF 10 mobile laboratory and field team operations.
- s. Other State Agencies  
See SCEOP, Basic Plan. A summary of the state primary and support agency responsibilities is found in Attachment A, Tab C.

**B. Local**

County and municipal emergency response agencies in concert with local government public service and private support agencies carry out a variety of actions and activities in support of a radiological emergency. These may include, but are not limited to: Direction and Control, Warning, Notification, Communication, Public Information, Accident Assessment, Health and Medical Services, Congregate Care, Fire and Rescue, Traffic Control, Law Enforcement, Transportation, and Radiological Exposure Control. County organizations and responsibilities in these areas are spelled out in each county's emergency operations plan (EOP).

**C. Federal**

The federal organization for emergency response to a radiological incident is coordinated under two plans: The Federal Radiological Emergency Response Plan (FRERP) and the all-hazards National Response Framework (NRF). The FRERP, which is in effect when more than one federal agency responds to a radiological emergency, designates the NRC as Lead Federal Agency (LFA) if the affected facility is licensed by the NRC or an Agreement State. As the LFA, the NRC coordinates the assessment of potential and actual radiological consequences and the federal positions on protective actions. Federal positions normally include assessments by the Environmental Protection Agency (EPA), the Department of Health and Human Services (HHS), and the U.S. Department of Agriculture (USDA). Federal response may include the Federal Bureau of Investigation (FBI) in the event of a terrorist or hostile-action based (HAB) incident. The Federal Emergency Management Agency (FEMA) promotes overall coordination among federal organizations, coordinates non-radiological activities, and serves as a source of information on the status of the total federal response.

## Basic Plan

---

- D. Supporting Organizations: Assistance from supporting organizations will be requested as needed.
1. State of North Carolina (See Basic Plan Attachment E).
  2. State of Georgia (See Attachment F).
  3. U.S. Department of Energy (DOE) through the Radiological Assistance Program (RAP). DOE, Savannah River Operations Office, is the designated point of contact for requesting federal radiological assistance under RAP. (See Attachment K)
  4. Progress Energy Carolinas, Inc. (See Attachment G)
  5. South Carolina Electric & Gas Company (See Attachment H).
  6. Duke Energy Carolinas (See Attachment I).
  7. Georgia Power Company/Southern Nuclear Operating Company (See Attachment J).
  8. Statement of Understanding between the State of South Carolina and the American Red Cross (ARC) dated April 24, 1987.
  9. Salvation Army (SA). Joint Operating Agreement between Division Headquarters for North and South Carolina Salvation Army and SC Emergency Management Division dated June 3, 1983.
  10. Others as outlined in the SC Emergency Operations Plan (SCEOP) and in Site Specific Parts following in this Plan.
- E. County Government
1. Maintain liaison and continuous communications with the NPP until relieved of responsibility by the SEOC.
  2. Provide representatives to SEOC as required.
  3. Prepare local NPP RER Plans and update as required.
  4. Execute Mutual Assistance Agreements as required.
  5. Execute RER Plans.
  6. Provide reception center and shelter operations as tasked in Site Specific Plans.
  7. Provide Mass Care Services (MCS) to evacuees as tasked in Site Specific Plans.

8. Conduct local RER exercises and drills.
  9. Provide an authorized spokesperson/representative to support public information activities.
  10. Alert and notify the general public in accordance with pre-established plans.
  11. Provide logistical support and assistance to Field Monitoring Teams upon request.
  12. Provide radiological monitoring and decontamination station for evacuees and emergency workers.
  13. Issue dosimeters and KI to emergency personnel when required and provide just-in-time training as necessary.
- F. Responsibilities of Nuclear Power Plants (NPPs)
1. Prepare and maintain on-site RER Plans in accordance with NRC Guidance and Regulations.
  2. Make the initial notification to the SC Warning Point (SCWP) and counties of declared radiological incidents.
  3. Maintain 24-hour redundant communication capability with the State Warning Point, the Department of Public Safety backup Warning Point and with local governments in the 10-mile EPZ.
  4. Recommend protective actions to the state and counties.
  5. Assist in off-site radiological assessment/monitoring in coordination with ESF 10.
  6. Provide JIC facilities, equipment and communications for state and local government public information organizations.
  7. Provide liaison to the SEOC and County EOCs.
  8. Assist with technical response training for off-site response personnel as necessary.
  9. Secure and update letters of agreement with local government emergency services that will provide on-site assistance, including quick access to protected areas.
  10. Provide annual training/information briefing for local news media in conjunction with the state.

## **Basic Plan**

---

11. Coordinate the development of exercise scenarios in conjunction with SCEMD and ESF 10.
12. Prepare and update a public information brochure to be distributed throughout the 10-mile EPZ on an annual basis.
13. Maintain close liaison with the state and local governments to assure procedures are compatible.
14. Coordinate with local governments to establish a designated near-site Incident Command Post (ICP) or alternate ICP as needed.
15. Provide dosimetry to emergency workers responding to incidents on-site when required.

### **VI. ADMINISTRATION, LOGISTICS AND FINANCE**

- A. Administration, logistics and finance are covered in the SCEOP and are also enumerated in the Site Specific parts of this plan.
- B. Emergency Operations Centers are located at the following:
  1. State Emergency Operations Center: 2779 Fish Hatchery Road, West Columbia, SC 29172.
  2. ESF 10 Forward Mobile Lab and Field Staging Areas (See Para V.4, (k). [2]):
  3. Building 15 – State Park Facility, Columbia, SC.

### **VII. CONTINUITY OF GOVERNMENT**

See Continuity of Government in the SCEOP.

### **VIII. CONTINUITY OF OPERATIONS (COOP)**

See Continuity of Operations in the SCEOP.

### **IX. PLAN DEVELOPMENT, IMPLEMENTATION AND MAINTENANCE**

- A. SCEMD will coordinate the development and revision of the Radiological Emergency Response (RER) plans with state and local agencies and with each NPP.
- B. RER plans will be reviewed annually and updated as required. If major changes occur that could affect state or local disaster operations prior to the due date of the annual revision, RER plans will be immediately changed to reflect current capabilities.

- C. State agency directors are responsible for developing and maintaining current plans (SOPs) for effective performance of their organizations' assigned RER functions, including contingency plans.
- D. The Director/Coordinator of the county emergency management organization will coordinate the development and revision of local RER plans with local government agencies.
- E. This plan is effective upon receipt by RER organizations, and it will be executed upon notification of a nuclear emergency.

## **X. AUTHORITIES AND REFERENCES**

### **A. State**

- 1. South Carolina Constitution, Article IV, § 1; § 13; and § 17
- 2. South Carolina Code of Laws ANN., § 25-1-420 through § 25-1-460; § 13-7-40 and -50
- 3. Regulation 58-1, Local Emergency Preparedness Standards; Regulation 58-101, State Emergency Preparedness Standards, South Carolina Code of Regulations; Regulations 61-63
- 4. South Carolina Emergency Operations Plan.
- 5. South Carolina Emergency Recovery Plan; Annex 2.

### **B. Federal**

- 1. NUREG-0654/FEMA-REP-1, REV. 1, *Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants*, November 1980.
- 2. NUREG-0654/FEMA-REP-1, REV. 1, Supplement 1, *Criteria for Utility Offsite Planning and Preparedness*, September 1988
- 3. NUREG-0654/FEMA-REP-1, REV. 1, Supplement 2, *Criteria for Emergency Planning in an Early Site Permit Application*, April 1996
- 4. NUREG-0654/FEMA-REP-1, REV. 1, Supplement 3, *Guidance for Protective Action Strategies*, November 2011
- 5. NUREG-0654/FEMA-REP-1, REV. 1, Supplement 4, *Criteria for National Preparedness Initiative Integration, Exercise Enhancement, and Backup Alert and Notification Systems*, October 2011
- 6. FEMA REP Program Manual, April 2012

7. Title 10 Code of Federal Regulations, Part 50
8. Title 44 Code of Federal Regulations, Part 350

C. Maps and Charts

1. Map, South Carolina State Highway Primary System, scale approximately 1 1/2 inches to 10 miles. SC Department of Transportation (DOT).
2. Map, Special, South Carolina Counties, scale approximately 1" to 2 miles. SC Department of Transportation, various dates.
3. Because of their bulk, maps will be pre-stocked at the State Emergency Operations Center (SEOC). Reduced size maps are substituted throughout this Plan and Site Specific Parts.

**XI. GLOSSARY AND ACRONYMS**

Access Control Point (ACP) – Specific locations where law enforcement officials prevent entry into restricted areas.

Area Requiring Corrective Action (ARCA) –A Federal classification describing an exercise problem or inadequacy which does not affect the public health and safety in the vicinity of a nuclear power plant (NPP), but which requires either a plan correction in the next update or correction by satisfactory performance in the next biennial NPP exercise.

Congregate Care –The provision of temporary housing and basic necessities for evacuees.

Contamination –The unwanted deposition or presence of radioactive matter.

Decontamination –The removal of radioactive contaminants from personnel, instruments, buildings and the environment to reduce or eliminate potential hazards to personnel.

Deficiency –A federal classification describing an exercise problem or inadequacy which, if not corrected, would endanger the public health and safety in the vicinity of a NPP which requires immediate correction of agency plans or procedures through a remedial exercise, drill, or other action.

Dosimeter –A device that measures the radiation dose accumulated. This may include pocket dosimeters, film badges, and thermoluminescent badges.

Dosimetry Redistribution –Dosimetry equipment from unaffected counties will be distributed to counties impacted by an actual NPP emergency.

Drill –A coordinated, supervised activity normally used to test a single specific operation or function in a single agency.

Emergency Alert System (EAS) –Radio, TV, and cable broadcast stations and non-governmental industry entities operating on a voluntary, organized basis during emergencies at national, state, or local levels.

Emergency Classification Level (ECL) –A group of terms (i.e., Notification of Unusual event (NUE), Alert, Site Area Emergency (SAE), and General Emergency (GE)) used to classify the gravity of a nuclear plant incident.

Emergency Operations Facility (EOF) – An off-site support facility provided by the licensee. It is intended to facilitate management of the overall coordination with federal, state and local officials, coordination of radiological and environmental assessments and determination of recommended public protective actions.

Emergency Operations Plan (EOP) –A clear, concise document that outlines policies and general procedures that provide a common basis for joint state and local operations during an emergency. Responsibilities of organizations and individuals to support those procedures are clearly detailed to facilitate prompt and efficient response during emergency operations.

Emergency Planning Zone (EPZ) –A circular area with a radius extending 10 miles from a NPP. It is commonly referred to as the 10-mile EPZ. This is the area where the most immediate actions would be required to protect the public from direct whole body exposure from a radioactive plume.

Emergency Support Function (ESF) –A functional emergency management area with a corresponding annex in the State EOP and Federal Response Plan (FRP) which tasks state and federal agencies to provide and/or coordinate certain resources in response to emergencies or disasters.

Emergency News Center (ENC) –A facility staffed by PIOs from multiple emergency response organizations for the purpose of providing a designated point of contact with the news media and to facilitate exchange and coordination of information dissemination to the public. This type of facility is also referred to as a Public Information Center, a Public Affairs Center, a Media Center, or a Joint Information Center.

Emergency Worker –An individual whose job assignment might require him/her to enter a restricted zone to engage in activities to protect the public health and safety from the radiation effects of an incident at a nuclear power plant. Those people will be required to wear dosimetry and may be required to wear protective clothing. Their stay times will be limited based upon established PAGs. Emergency workers include, but are not limited to, radiological field monitoring and sampling teams, law enforcement/traffic control officers, firefighters and emergency medical personnel. This definition may be further expanded to include other categories such as farmers, utility workers or others required to carry out maintenance functions within the restricted area. Permission to allow expansion of the “emergency worker” category will be based upon the recommendation of the qualified radiological health professionals who have assessed the accident situation.

Exercise –A rehearsal of a simulated emergency, in which members of various agencies perform the tasks that would be expected of them in a real emergency.

Environmental Protection Agency (EPA) 400 –EPA 400-R-92-001 is the revision to EPA 520/1-75-001-A and is entitled “Manual of Protective Action Guides and Protective Actions for Nuclear Incidents” published by the U.S. Environmental Protection Agency.

Full Participation Exercise –Refers to each organization demonstrating all of the emergency phase capabilities outlined in its plans, including facility and field-based (DHEC field teams) functions.

Guidance Memorandum –A Federal Emergency Management Agency (FEMA) document which sets forth policies and procedures related to Radiological Emergency Preparedness (REP) regulations or general agency policies and which provides clarification and interpretation of other REP guidance documents (e.g., 44 CFR 350 and NUREG-0654/FEMA-REP-1).

Hostile Action Based (HAB) – An act toward a nuclear power plant or its personnel that includes the use of violent force to destroy equipment, take hostages, and/or intimidate the licensee to achieve an end. This includes attack by air, land, or water using guns, explosives, projectiles, vehicles, or other devices used to deliver destructive force.

Host County – Any county that provides reception and congregate care for evacuees from risk counties.

Ingestion Exposure Pathway –A circular area having a radius of about 50 miles measured from a NPP. It is commonly referred to as the 50-mile IPZ. In the event of a plant incident that results in a radioactive release, human foods, animal feeds and water in this area may be contaminated and actions to protect the public from the ingestion of these contaminated materials may need to be initiated.

Ionizing Radiation –Radiation that causes ionization either directly or through secondary effects. Types of ionizing radiation of nuclear origin include gamma rays, alpha particles, beta particles and neutrons.

Joint Information Center (JIC) – A facility staffed by PIOs from multiple emergency response organizations for the purpose of providing a designated point of contact with the news media and to facilitate exchange and coordination of information dissemination to the public. This type of facility is also referred to as a Public Information Center, a Public Affairs Center, a Media Center, or an Emergency News Center.

Joint Information System (JIS) –A structure that integrates incident information and public affairs into a cohesive organization designed to provide consistent, coordinated, accurate, accessible, timely, and complete information during a crisis or incident operation.

Nuclear Power Plant (NPP) – An electric generating facility using a nuclear reactor as its power (heat) source.

NUREG 0654 –The guidance published jointly by the FEMA and the Nuclear Regulatory Commission (NRC) entitled “Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants” which

forms the basis for developing and exercising plans.

Off-site –The area outside the nuclear power plant boundary within which federal, state and local governments are responsible for protection of the public.

On-site –The area within the facility site boundary and within which the licensee is responsible for emergency response and nuclear safety.

Partial Participation Exercise– Refers to each organization demonstrating all of the emergency phase capabilities outlined in its plan, excluding field activities (DHEC field teams).

Pick- up Point –The location school children are moved to for pick-up by parents. If school is in session when an emergency occurs, school officials will move children to a pre-designated pick-up point.

Protective Action – An action taken to avoid all or most of the exposure of humans or animals to radiation either immediately or in the aftermath of a radioactive release. Protective actions may include such things as sheltering-in-place, placing cattle on stored feed, evacuation or decontamination of human foods and animal feeds.

Protective Action Guide (PAG) –The numeric projected doses of radiation to individuals which act as “trigger points” to initiate protective actions.

Operational Support Center (OSC) –A location on the NPP site where, in the event of an emergency, shift support personnel (e.g. auxiliary operators and technicians) other than those required and allowed in the control room will report for further orders and assignments.

Rad –A basic unit of absorbed dose of ionizing radiation. A measure (applicable to any form of ionizing radiation) of actual energy absorption.

Radiation –The propagation of energy through space and matter.

Radiological Exposure Control –Actions taken to protect the general public, emergency workers, livestock, water or property from radiation.

Reception Center –Serves as a focal point during evacuation and provides a place for coordination of registration, radiological monitoring and decontamination. Congregate care operations, such as sheltering and feeding, may be provided in a separate area of a reception center or in separate shelter facilities.

Re-Entry –Return to evacuated areas by resident populations that may be constrained by time or function based on the existing situations.

Relocation –Evacuees are moved to another location outside the hazard area for domicile.

Rem –A unit of absorbed dose of ionizing radiation in biological matter. Specifically, the absorbed dose of Rads multiplied by a constant that takes into account the biological effectiveness of a particular radiation.

Return –Reoccupation of areas cleared for unrestricted residence or use by previously evacuated or relocated populations.

Risk County –A county with any portion of its political boundaries located within the 10-mile plume exposure pathway emergency planning zone.

Shelter –Pre-identified sites in existing structures or temporary facilities used to house personnel displaced as a result of an emergency evacuation or the effects of a natural or man-made disaster. Primary shelters will be utilized first, and then back-up shelters will be used as needed.

South Carolina Operational Radiological Emergency Response Plan (SCORERP) –The document that establishes policies and procedures for South Carolina’s radiological emergency response planning and operations.

South Carolina Technical Radiological Emergency Response Plan (SCTRERP) –The Department of Health and Environmental Control (DHEC) document that establishes policies and procedures for the utilization of technical resources during an emergency resulting from an incident at an NPP.

Standard Operating Procedures (SOPs) –A set of detailed steps or tasks for use by an organization or individual to fulfill responsibilities and perform tasks outlined in an Emergency Operations Plan.

Technical Support Center (TSC) –An on-site facility for use by plant management, technical and engineering support personnel. In an emergency it will be used to evaluate plant status in support of short-term operations.

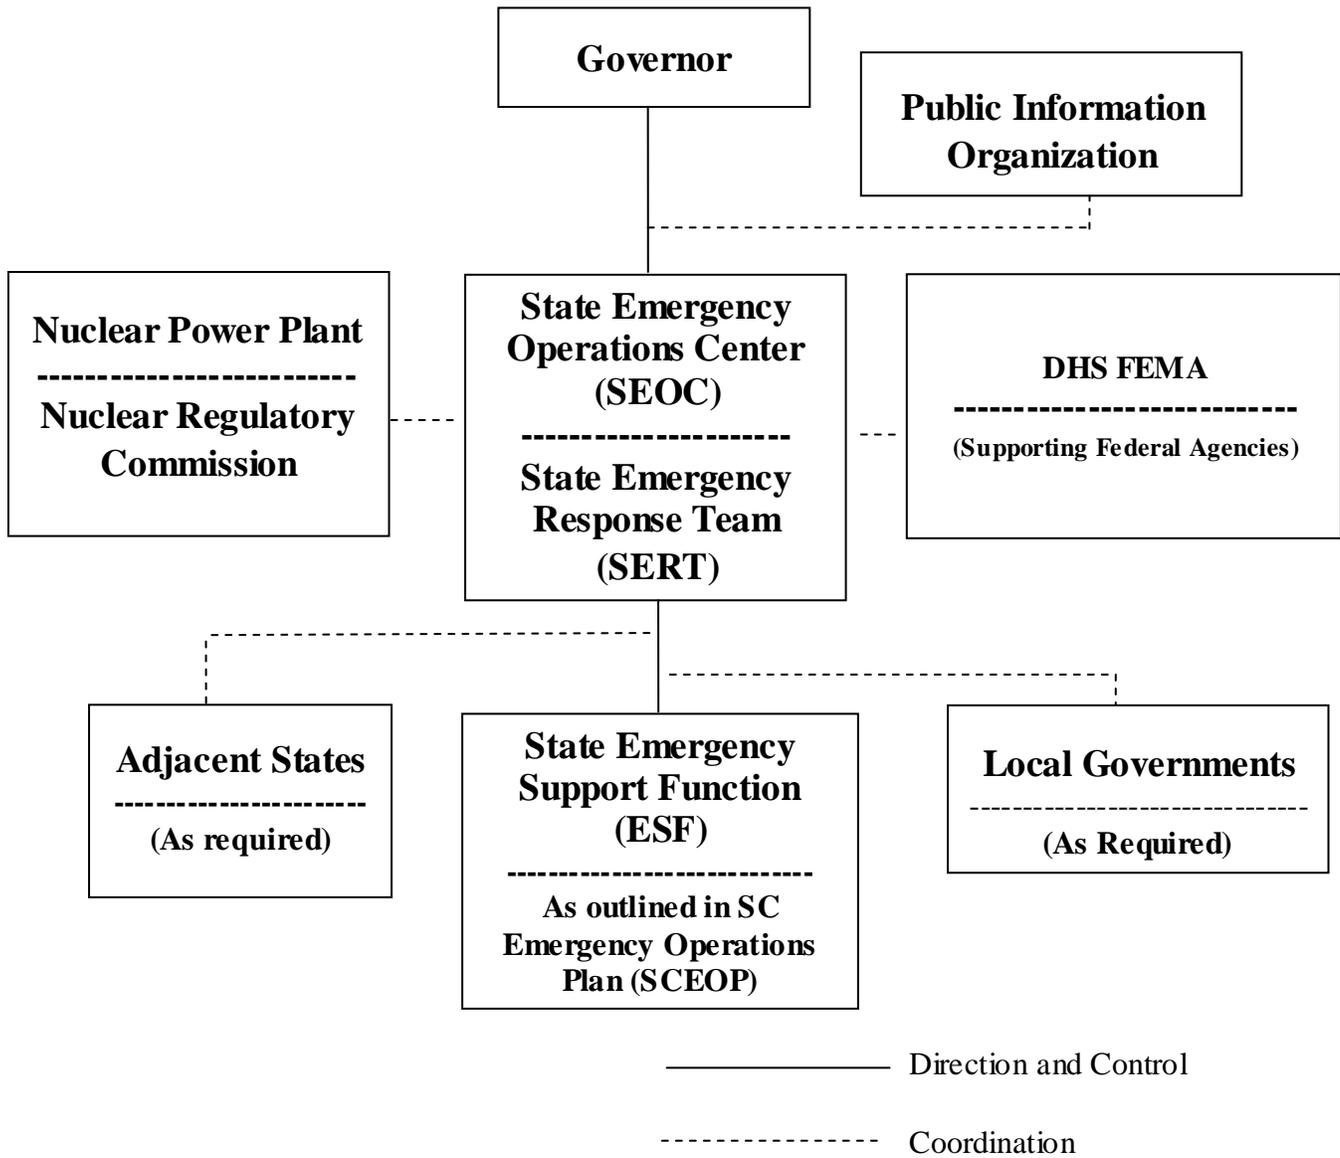

Traffic Control Point (TCP) –Specific locations where law enforcement officials facilitate evacuation along specific routes.

Turn Back Value –The maximum allowable exposure for workers within a contaminated area. When exposure levels are reached emergency workers are removed from the area.

Warning Point (WP) –A facility that receives warning and other information and disseminates or relays this information in accordance with a prearranged plan.

**ATTACHMENT B, SCORERP. EMERGENCY CLASSIFICATION LEVELS**

CLASS		NOTIFICATION OF UNUSUAL EVENT	
CLASS DESCRIPTION		Events are in process or have occurred which indicate a potential degradation of the level of safety of the plant or a security threat to facility protection. No releases of radioactive material requiring off-site response or monitoring are expected unless further degradation of safety systems occurs.	
LICENSEE ACTIONS	STATE ACTIONS	LOCAL ACTIONS	
<ol style="list-style-type: none"> <li>1) Promptly inform SCWP and affected counties of nature of unusual condition as soon as discovered.</li> <li>2) Augment on-shift resources.</li> <li>3) Assess and respond.</li> <li>4) Escalate to a more severe class, if appropriate.</li> <li>5) Close out with verbal summary to off-site authorities followed by written summary within 24 hours.</li> </ol>	<ol style="list-style-type: none"> <li>1) SCWP verifies county notification.</li> <li>2) SCWP notifies ESF 10.</li> <li>3) For security threats, verify SLED has been notified.</li> <li>4) ESF 10 (or ESF 13 if security related) assesses situation with plant and confirms with SCEMD.</li> <li>5) SCEMD notifies Governor's Office &amp; OTAG.</li> <li>6) Escalate response to more severe class, if appropriate.</li> <li>7) Stand by until verbal notification of closeout.</li> </ol> <p><b>Note: If the UE is due to the declaration of Condition B at Lake Jocassee or Keowee Dam:</b></p> <ol style="list-style-type: none"> <li>1. Alert downstream counties: confirm Pickens/ Oconee County by phone.</li> <li>2. Partially activate the SEOC (ALERT).</li> <li>3. Place DNR/SCHP officers on standby. Consider SCDOT, if required.</li> <li>4. Monitor conditions at Keowee Dam.</li> </ol> <p>If Keowee Dam declares Condition A, SAE is declared by ONS.</p>	<ol style="list-style-type: none"> <li>1) Provide fire, medical, or security assistance if required.</li> <li>2) Escalate response to more severe class if so notified.</li> <li>3) Stand by until verbal notification of closeout.</li> </ol>	

ATTACHMENT B, SCORERP. EMERGENCY CLASSIFICATION LEVELS (ECLS) (continued)

CLASS		ALERT	
CLASS DESCRIPTION		Events are in process or have occurred which involve an actual or potential substantial degradation of the level of safety of the plant or a security event that involves probable life threatening risk to site personnel or damage to site equipment because of intentional malicious dedicated efforts of a hostile act. Any releases are expected to be limited to small fractions of the EPA Protective Action Guideline exposure levels.	
LICENSEE ACTIONS	STATE ACTIONS	LOCAL ACTIONS	
<ol style="list-style-type: none"> <li>1) Promptly inform SCWP and affected counties of ALERT status.</li> <li>2) Augment resources, activate on-site Technical Support Center (TSC) and on-site Operational Support Center (OSC). Emergency Operations Facility (EOF) and other key personnel to standby.</li> <li>3) Assess and respond.</li> <li>4) Consider activating the Joint Information Center.</li> <li>5) Dispatch on-site monitoring teams and associated communications.</li> <li>6) Provide periodic plant status updates to off-site authorities (<i>at least once every hour</i>).</li> <li>7) Provide periodic meteorological assessments to off-site authorities, and dose estimates for actual releases.</li> <li>8) Escalate to a more severe class, if appropriate.</li> </ol>	<ol style="list-style-type: none"> <li>1) SCWP verifies county notification.</li> <li>2) SCWP notifies ESF 10.</li> <li>3) For security threats, verify SLED has been notified.</li> <li>4) ESF 10 (or ESF 13 if security related) assesses situation with plant and confirms with SCEMD. Recommends response required.</li> <li>5) SCEMD notifies Governor's Office, OTAG, North Carolina, Georgia and FEMA.</li> <li>6) Governor considers declaring a State of Emergency.</li> <li>7) Alert key emergency response personnel to stand by status.</li> <li>8) SCEMD Director will determine level of SEOC activation.</li> <li>9) Consider activating a Joint Information Center and/or deploying Public Information LNOs.</li> </ol>	<ol style="list-style-type: none"> <li>1) Provide fire, medical, or security assistance on request.</li> <li>2) Augment resources and bring EOC(s) to standby status. Consider activation of EOC(s) downwind from facility.</li> <li>3) Bring alert and notification systems to standby status.</li> <li>4) Activate siren system and EAS in 10-mile EPZ if recommended.</li> <li>5) Alert key personnel to standby status.</li> <li>6) Consider precautionary protective actions for schools.</li> <li>7) Notify Host Counties of ALERT status.</li> <li>8) Escalate to more severe class if notified.</li> <li>9) Maintain ALERT status until verbal notification of closeout or reduction of emergency class.</li> <li>10) Consider deploying county PIO to JIC, if activated.</li> </ol>	

ATTACHMENT B, SCORERP. EMERGENCY CLASSIFICATION LEVELS (ECLS) (continued)

CLASS		ALERT	
CLASS DESCRIPTION		Events are in process or have occurred which involve an actual or potential substantial degradation of the level of safety of the plant or a security event that involves probable life threatening risk to site personnel or damage to site equipment because of intentional malicious dedicated efforts of a hostile act. Any releases are expected to be limited to small fractions of the EPA Protective Action Guideline exposure levels.	
LICENSEE ACTIONS	STATE ACTIONS	LOCAL ACTIONS	
9) Close out or recommend reduction in emergency class to off-site authorities followed by written summary within 8 hours.	10) Coordinate activation of siren system and EAS in 10-mile EPZ if recommended. 11) Verify notification of Host counties. Notify, if necessary. 12) Consider notification of 50-mile EPZ counties. 13) Consider activation of Dosimetry Redistribution SOP. 14) Provide assistance requested from counties and facility. 15) Escalate response to more severe class if appropriate. 16) Maintain ALERT status until verbal closeout or reduction of emergency class. 17) Consider deploying state LNOs to affected County EOC.

**ATTACHMENT D, SCORERP. EPZ ACCESS CONTROL IDENTIFICATION PROCEDURES**

SLED, under the direction of ESF 13, has responsibility for coordinating security and access to evacuated and restricted areas during an NPP emergency. The following identification procedures are established to facilitate access of emergency workers, residents, utility personnel, and media representatives.

A. Public Safety/Emergency Workers

All uniformed public safety agents with proper identifying credentials will be allowed access to the restricted area. This includes, but is not limited to, police, fire and emergency medical personnel.

Agency Identification Cards of state and federal non-uniformed emergency workers will be honored. Individuals in this category include ESF 10 and U.S. government field monitoring personnel, state and local emergency management officials and staff.

B. Utility Personnel

Utility personnel are issued company identification cards and/or plant identification. Display of either form of identification indicates authorized access to the affected facility.

C. News Media

Bonafide members of the media should possess official identification from their employing organization. Media representatives will not be permitted to enter evacuated areas or go beyond two-mile roadblocks.

D. EPZ Residents/Business Owners

Residents/Business Owners of evacuated or restricted areas must possess specific written authorization from county emergency management officials. Passes for access will be issued at county emergency operation centers (EOCs) or at designated access control points when activated.

**ATTACHMENT E, SCORERP. LETTER OF AGREEMENT, STATES OF NORTH AND SOUTH CAROLINA**

AGREEMENT

THIS AGREEMENT is made by and between the GOVERNOR of the State of North Carolina and the GOVERNOR of the State of South Carolina.

- Section 1. Each Governor shall notify the Governor of the adjoining sister state, through the STATE EMERGENCY OPERATING CENTERS or other duly responsible state department, of any release of radioactive materials into the environment (air, ground, river, stream, etc.) that may affect the environment of the adjoining sister state.
- Section 2. This NOTIFICATION is to take place immediately upon the identification of a release of radioactive materials that might constitute such a threat. Subsequent notices shall be given as necessary.
- Section 3. MESSAGES will include, at the minimum, information indicated in the attached standard message. (See Figure 1, Annex A to SCORERP).
- Section 4. THIS AGREEMENT is to become effective upon signing by both Governors. It shall be automatically renewed from year to year, subject to the right of either Governor to terminate THIS AGREEMENT at any time during the term by furnishing thirty (30) days prior written notice to the other Governor that termination is desired.

IN WITNESS WHEREOF the parties hereto have executed THIS AGREEMENT as of the day and year hereinafter written.

ATTACHMENT G, SCORERP. MOU BETWEEN SCEMD, SCDHEC AND SCE&G

**MEMORANDUM OF UNDERSTANDING  
BETWEEN  
THE SOUTH CAROLINA EMERGENCY MANAGEMENT DIVISION  
THE SOUTH CAROLINA DEPARTMENT OF HEALTH AND ENVIRONMENTAL CONTROL  
AND  
THE SOUTH CAROLINA ELECTRIC & GAS COMPANY**

I. PURPOSE

This Memorandum of Understanding establishes an agreement between the South Carolina Emergency Management Division (SCEMD), the South Carolina Department of Health and Environmental Control, and the South Carolina Electric & Gas Company pertaining to the V.C. Summer Nuclear Station (VCS). It establishes the overall responsibilities relating to emergency preparedness planning, training, coordination, notification, hazard assessment and technical support in the event of a radiological incident at the V.C. Summer Nuclear Station that might affect the health, safety and property of the citizens of South Carolina and/or give cause for public concern.

II. AUTHORITY

- A. Act 223, 1967 - South Carolina Atomic Energy and Radiation Control Act as amended.
- B. South Carolina Act number 199, dated July 30, 1979.

III. AGREEMENT

In accordance with Act 223, 1967; Act 199, 1979; and this Memorandum, the three agencies/organizations listed above agree with the following:

- A. Emergency Management Division (EMD) will:
  - 1. Prepare and maintain State Operational Radiological Emergency Response (RER) Plans.
  - 2. Coordinate with DHEC, VCS, and local governments in the development of RER Plans.
  - 3. Ensure VCS is provided a copy of all changes or updates to the SCORERP or VCS site specific.
  - 4. Assist local governments in preparing and maintaining local RER Plans.
  - 5. Establish and direct the State Emergency Operations Center (SEOC) when directed by the Governor.

**ATTACHMENT G, SCORERP. MOU BETWEEN SCEMD, SCDHEC AND SCE&G** (continued)

6. Coordinate off-site support from state, federal, and other support agencies.
7. Recommend and direct protective actions to include evacuation as well as recovery and re-entry operations in coordination with DHEC.
8. Provide for a 24-hour notification capability with DHEC, other state RER support agencies, affected counties, VCS and the state of North Carolina and insure notification is made as appropriate.
9. Participate with DHEC, VCS and local governments, in the development of exercise scenarios.
10. Conduct RER drills and exercises for VCS as specified in NUREG-0654, FEMA REP-1, REV.1.
11. Maintain close liaison with the nuclear industry to assure that state and VCS RER procedures are compatible.
12. Coordinate public meetings for an emergency management exercise when required.
13. Coordinate and conduct off-site evaluation critiques for each VCS exercise.
14. Prepare off-site after-action reports for each VCS exercise.
15. Secure and maintain appropriate letters of agreement.
16. Coordinate all information on the status of emergency operations and radiological hazards through the News Media Center, if established, or the Governor's Press Office, for release to the public.
17. Coordinate with DHEC and VCS for the RER training of state and local government personnel.

B. Department of Health and Environmental Control (DHEC) will:

1. Provide for 24-hour accident response capability with VCS and EMD and insure notification is made.
2. Prepare and maintain the State Technical Radiological Emergency Response Plan.
3. Participate with EMD, VCS, and local governments in the development of RER Plans.

**ATTACHMENT G, SCORERP. MOU BETWEEN SCEMD, SCDHEC AND SCE&G** (continued)

4. Maintain a radiological hazard assessment capability and provide radiological technical support, coordination and guidance for the state and local governments.
  5. Conduct and/or coordinate off-site radiological surveillance and monitoring in coordination with the VCS off-site environmental monitoring group.
  6. Make recommendations to EMD for protective actions as well as recovery and re-entry guidelines.
  7. Provide representatives at the SEOC and VCS.
  8. Obtain and coordinate radiological assistance resources from the federal government, other states, and the nuclear industry as required.
  9. Provide RER training to state agencies and local governments.
  10. Participate in training programs given by VCS for Radiological Monitoring Teams.
  11. Participate with EMD and VCS in the development of exercise scenarios.
  12. Participate in VCS exercises and drills.
  13. Secure and maintain appropriate letters of agreement.
  14. Coordinate all information on the status of emergency operations and radiological hazards through the News Media Center, if established, or the Governor's Press Office, for release to the public.
  15. Maintain close liaison with the nuclear industry to assure that state and VCS RER procedures are compatible.
- C. South Carolina Electric & Gas Company (SCE&G) will:
1. Prepare and maintain on-site Radiological Emergency Response Plans in accordance with Nuclear Regulatory Commission Rules and Regulations.
  2. Maintain a 24-hour communications capability with the Highway Department Warning Point and/or the SEOC and with local governments in the 10-Mile EPZ.
  3. Notify the South Carolina State Warning Point and affected counties of a VCS accident consistent with approved SCE&G emergency notification procedures.

**ATTACHMENT G, SCORERP. MOU BETWEEN SCEMD, SCDHEC AND SCE&G** (continued)

4. Recommend protective actions directly to affected counties when the SEOC is not operational.
5. Assist in off-site radiological assessment/monitoring capabilities in coordination with DHEC.
6. Provide Media Center facilities and communications.
7. Be prepared to assist DHEC at other fixed nuclear facility accidents based upon availability.
8. Provide liaison to the SEOC.
9. Provide RER training for site personnel.
10. Assist with technical response training for off-site response personnel as necessary.
11. Secure and update letters of agreement with local government emergency services that will provide on-site assistance.
12. Provide annual training/information briefing of local news media in conjunction with the state.
13. Participate with DHEC, EMD, and local governments in the development of exercise scenarios.
14. Participate in exercises and drills.
15. Prepare and update a public information brochure to be distributed throughout the 10-Mile EPZ on an annual basis.
16. Maintain close liaison with the state and local governments to assure procedures are compatible.

IV. IMPLEMENTATION

This agreement will commence with the signing of this Memorandum of Understanding by the South Carolina Emergency Management Division, the South Carolina Department of Health and Environmental Control, and the South Carolina Electric & Gas Company and supersedes all previous agreements, relating to Radiological Incident responsibilities, between the aforementioned agencies/organizations.

It shall be automatically renewed from year to year. It may be amended by mutual consent or terminated by either party upon giving at least thirty (30) days written notice to the other parties.

CAROLINA POWER & LIGHT COMPANY D/B/A PROGRESS ENERGY CAROLINAS, INC.

I. PURPOSE

This Memorandum of Understanding establishes an agreement among the South Carolina Emergency Management Division (SC EMD), the South Carolina Department of Health and Environmental Control (SC DHEC), Duke Energy Carolinas, LLC (Duke Carolinas), and Carolina Power & Light Company d/b/a Progress Energy Carolinas, Inc. (Progress Carolinas and, together with Duke Carolinas, Duke Energy) pertaining to the Catawba Nuclear Station (CNS), Oconee Nuclear Station (ONS), and H. B. Robinson Nuclear Plant (RNP). For purposes of clarification, Duke Carolinas enters into this MOU as owner and operator of CNS and ONS, and Progress Carolinas enters into this MOU as owner and operator of RNP. It establishes the overall responsibilities relating to emergency preparedness planning, training, coordination, notification, hazard assessment and technical support in the event of a radiological incident at CNS, ONS and RNP that might affect the health, safety and property of the citizens of South Carolina and/or give cause for public concern. A separate *Grant Agreement* defines the financial obligations of the above parties.

II. AUTHORITY

- A. South Carolina Code Ann., §13-7-10 et seq.; relating to atomic energy and radiation control.
- B. South Carolina Code Ann., §25-1-420; South Carolina Emergency Management Division of the Office of the Adjutant General, and its duties.

III. AGREEMENT

In accordance with S.C. Code Ann. §13-7-10 et seq. and S.C. Code Ann. § 25-1-420, and this Memorandum, the three agencies/organizations listed above agree as follows:

- A. South Carolina Emergency Management Division will:
  - 1. Prepare and maintain South Carolina Operational Radiological Emergency Response Plan (SCORERP).

2. Coordinate with SC DHEC, Duke Energy, and local governments in the development of Radiological Emergency Response (RER) Plans.
3. Prepare and maintain site specific plans for CNS, ONS, and RNP.
4. Assist local governments in preparing and maintaining local RER Plans.
5. Activate and direct State Emergency Operations Center (SEOC) when directed by the governor.
6. Coordinate off-site support from state, federal, and other support agencies.
7. Recommend and direct protective actions to include evacuation as well as recovery/re-entry operations in coordination with SC DHEC.
8. Provide a 24-hour notification capability with SC DHEC, affected counties, Duke Energy, other Emergency Support Function support agencies, and the States of North Carolina and Georgia and ensure notification is made per the SCORERP.
9. Participate with SC DHEC, Duke Energy, and local governments, in the development of exercise scenarios.
10. Conduct RER drills and exercises for Duke Energy, as specified in 10 CFR 50, Appendix E, and FEMA regulations.
11. Maintain close liaison with Duke Energy to assure that State and Duke Energy RER procedures are compatible.
12. Coordinate public meetings for an emergency preparedness exercise when required.
13. Coordinate off-site evaluation critiques for each CNS, ONS or RNP exercise.
14. Secure and maintain appropriate letters of agreement per the SCORERP.
15. Coordinate all information on the status of emergency operations

and radiological hazards through the Joint Information Center, if established, or the Governor's Press Office, for release to the public.

16. Coordinate with SC DHEC and Duke Energy for the RER training of state and local government personnel.
17. Pursuant to 44 CFR 350.5 and guidance contained in the FEMA Radiological Emergency Preparedness Program Manual (April 2012), review the SCORERP annually and update as necessary.

B. South Carolina Department of Health and Environmental Control will:

1. Prepare and maintain the South Carolina Technical Radiological Emergency Response Plan (SCTRERP).
2. Provide for 24-hour accident response capability with Duke Energy and SC EMD and ensure notification is made per the STRERP.
3. Participate with SC EMD, Duke Energy and local government in the development of RER Plans.
4. Maintain a radiological hazard assessment capability and provide radiological technical support, coordination and guidance for the state and local governments.
5. Conduct and/or coordinate off-site radiological surveillance and monitoring with the Duke Energy off-site monitoring group.
6. Make recommendations to SC EMD for protective actions as well as recovery and re-entry guidelines.
7. Provide representatives to the appropriate site's Emergency Operations Facility and the SEOC, if activated.
8. Obtain and coordinate radiological assistance resources from the federal government, other mutual-aid states, and the nuclear industry as required.
9. Provide RER training to state agencies and local governments when requested.
10. Participate in annual training programs given by Duke Energy.

11. Participate with SC EMD and Duke Energy in the development of exercise scenarios.
12. Participate in CNS, ONS, and RNP federally evaluated exercises and drills, and other exercises and drills as resources allow.
13. Coordinate all information on the status of emergency operations and radiological hazards through the state Joint Information Center, if established, or the Governor's Press Office, for release to the public.
14. Maintain close liaison with Duke Energy and SC EMD to assure that RER plans are compatible and reviewed annually.

C. Each of Duke Carolinas and Progress Carolinas will:

1. Prepare and maintain on-site radiological emergency response plans in accordance with Nuclear Regulatory Commission Regulations.
2. Maintain the ability for 24-hour communications with the South Carolina State Warning Point (SC EMD), South Carolina State Backup Warning Point, and with local governments in the 10-Mile Emergency Planning Zone (EPZ) during an emergency.
3. Notify the South Carolina State Warning Point and affected counties of an emergency, consistent with approved emergency response procedures.
4. Recommend protective actions directly to affected counties when SEOC is not operational, consistent with approved emergency response procedures.
5. Conduct off-site radiological assessment/monitoring in coordination with SC DHEC.
6. Provide Joint Information Center facilities and communications.
7. Be prepared to assist SC DHEC at other fixed nuclear facility accidents upon availability.
8. Provide trained liaison to the SEOC.
9. Provide RER training for site personnel.

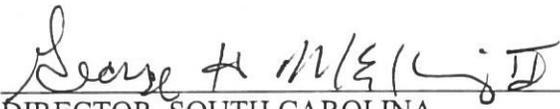

10. Assist with technical response training for off-site response personnel as necessary.
11. Secure and update letters of agreement with local government emergency services that will provide on-site assistance.
12. Provide annual training/information briefing to local news media.
13. Participate with SC DHEC, SC EMD, and local government in the development of exercise scenarios.
14. Conduct required CNS, ONS, and RNP exercises and drills.
15. Prepare and update public information materials to be distributed throughout the 10-Mile EPZ on an annual basis.
16. Maintain close liaison with the state and local governments to assure procedures are compatible.

IV. IMPLEMENTATION

This agreement will commence with the signing of this Memorandum of Understanding by the South Carolina Emergency Management Division, the South Carolina Department of Health and Environmental Control, Duke Carolinas, and Progress Carolinas and supersedes all previous agreements, relating to Radiological Incident responsibilities, among the aforementioned agencies/organizations.

It shall be reviewed annually and renewed at least every 3 years. It may be amended by written mutual consent or terminated by any party upon giving at least thirty (30) days written notice to the other parties.

MEMORANDUM OF UNDERSTANDING  
BETWEEN  
THE SOUTH CAROLINA EMERGENCY MANAGEMENT DIVISION  
THE SOUTH CAROLINA DEPARTMENT OF HEALTH AND ENVIRONMENTAL CONTROL  
AND  
GEORGIA POWER COMPANY

I. PURPOSE

This Memorandum of Understanding establishes an agreement between the South Carolina Emergency Management Division, the South Carolina Department of Health and Environmental Control, and Georgia Power Company pertaining to the Vogtle Electric Generating Plant (VEGP). It establishes the overall responsibilities relating to emergency preparedness planning, training, coordination, notification, hazard assessment and technical support in the event of a radiological incident at the Vogtle Electric Generating Plant (VEGP) that might affect the health, safety and property of the citizens of South Carolina and/or give cause for public concern.

II. AUTHORITY

- A. Act 223, 1967 - South Carolina Atomic Energy and Radiation Control Act as amended.
- B. South Carolina Act number 199, dated July 30, 1979.

III. AGREEMENT

In accordance with Act 223, 1967; Act 199, 1979; and this Memorandum, the three agencies/organizations listed above agree with the following:

- A. Emergency Management Division (EMD) will:
  - 1. Prepare and maintain State Operational Radiological Emergency Response (RER) Plans.
  - 2. Coordinate with DHEC, VEGP, and local governments in the development of RER Plans.
  - 3. Prepare and maintain site specific plans for VEGP.
  - 4. Assist local governments in preparing and maintaining local RER Plans.
  - 5. Establish and direct the State Emergency Operations Center (SEOC) when directed by the Governor.
  - 6. Provide liaison to the VEGP EOF when activated.

**ATTACHMENT I, SCORERP. MOU BETWEEN SCEMD, SCDHEC AND GEORGIA POWER COMPANY (continued)**

7. Coordinate off-site support from state, federal, and other support agencies.
8. Recommend and direct protective actions to include evacuation as well as recovery and re-entry operations in coordination with DHEC.
9. Provide for a 24-hour notification capability with DHEC, other state RER support agencies, affected counties, VEGP and the state of Georgia and insure notification is made as appropriate.
10. Participate with DHEC, VEGP and local governments, in the development of exercise scenarios.
11. Conduct RER drills and exercises for VEGP as specified in 10CFR50, Appendix E.
12. Maintain close liaison with the nuclear industry to assure that State and VEGP RER procedures are compatible.
13. Coordinate public meetings for an Emergency Management exercise when required.
14. Coordinate and conduct off-site evaluation critiques for each VEGP exercise.
15. Prepare off-site after-action reports for each VEGP exercise.
16. Secure and maintain appropriate letters of agreement.
17. Coordinate all information on the status of emergency operations and radiological hazards through the Emergency News Center, if established, or the Governor's Press Office, for release to the public.
18. Coordinate with DHEC and VEGP for the RER training of state and local government personnel.

**B. Department of Health and Environmental Control (DHEC) will:**

1. Provide for 24-hour accident response capability with VEGP and EMD and insure notification is made as appropriate.
2. Prepare and maintain the State Technical Radiological Emergency Response Plan.
3. Participate with EMD, VEGP, and local governments in the development of RER Plans.
4. Maintain a radiological hazard assessment capability and provide radiological technical support, coordination and guidance for the state and local governments.

**ATTACHMENT I, SCORERP. MOU BETWEEN SCEMD, SCDHEC AND GEORGIA POWER COMPANY (continued)**

5. Conduct and/or coordinate off-site radiological surveillance and monitoring in South Carolina in coordination with the VEGP.
6. Make recommendations to EMD for protective actions as well as recovery and re-entry guidelines.
7. Provide representatives at the SEOC and VEGP Emergency Operations Facility when activated.
8. Obtain and coordinate radiological assistance resources from the federal government, other states, and the nuclear industry as required.
9. Provide RER training to state agencies and local governments.
10. Participate in training programs given by VEGP for Radiological Monitoring Teams.
11. Participate with EMD and VEGP in the development of exercise scenarios.
12. Participate in VEGP exercises and drills.
13. Secure and maintain appropriate letters of agreement.
14. Coordinate all information on the status of emergency operations and radiological hazards through the Emergency News Center, if established, or the Governor's Press Office, for release to the public.
15. Maintain close liaison with the nuclear industry to assure that state and VEGP RER procedures are compatible.

C. The Vogtle Electric Generating Plant will:

1. Prepare and maintain on-site Radiological Emergency Response Plans in accordance with Nuclear Regulatory Commission Rules and Regulations.
2. Maintain the ability for 24-hour communications with the Highway Department Warning Point and/or the SEOC and with local governments in the 10-Mile EPZ during emergency conditions.
3. Notify the South Carolina State Warning Point and affected counties of an accident consistent with approved emergency notification procedures.
4. Recommend protective actions to EMD, DHEC, and affected counties.
5. Assist in off-site radiological assessment/monitoring capabilities in coordination with DHEC.

**ATTACHMENT I, SCORERP. MOU BETWEEN SCEMD, SCDHEC AND GEORGIA POWER COMPANY (continued)**

6. Provide Emergency News Center facilities and communications.
7. Provide liaison to the SEOC.
8. Provide RER training for site personnel.
9. Assist with technical response training for off-site response personnel as necessary.
10. Provide annual training/information briefing of local news media.
11. Participate with DHEC, EMD, and local governments in the development of exercise scenarios.
12. Conduct required VEGP exercises and drills.
13. Prepare and update a public information brochure to be distributed throughout the 10-Mile EPZ on an annual basis.
14. Maintain close liaison with the state and local governments to assure procedures are compatible.

**IV. IMPLEMENTATION**

This agreement will commence with the signing of this Memorandum of Understanding by the South Carolina Emergency Management Division, the South Carolina Department of Health and Environmental Control, and Georgia Power Company and supersedes all previous agreements, relating to Radiological Incident responsibilities, between the aforementioned agencies/organizations.

It shall be automatically renewed from year to year. It may be amended by mutual consent or terminated by either party upon giving at least thirty (30) days written notice to the other parties.

**ATTACHMENT J, SCORERP. MOU AMONG DOE-SAVANNAH RIVER OPERATIONS OFFICE, SCEMD, SCDHEC RE: VOGTLE ELECTRIC GENERATING PLANT**

DE-MUO9-85SR15114

**MEMORANDUM OF UNDERSTANDING AMONG THE DEPARTMENT OF ENERGY SAVANNAH RIVER OPERATIONS OFFICE, THE SOUTH CAROLINA EMERGENCY MANAGEMENT DIVISION, AND THE SOUTH CAROLINA DEPARTMENT OF HEALTH AND ENVIRONMENTAL CONTROL CONCERNING EMERGENCY PLANNING, PREPAREDNESS AND RESPONSE IN SOUTH CAROLINA FOR INCIDENTS AT THE SOUTHERN NUCLEAR OPERATING COMPANY VOGTLE ELECTRIC GENERATING PLANT****I. PURPOSE:**

This Memorandum of Understanding (MOU) establishes an agreement among the Department of Energy Savannah River Operations Office (DOE-SR), South Carolina Emergency Management Division (SCEMD), and the South Carolina Department of Health and Environmental Control (SCDHEC). It establishes emergency management (planning, preparedness and response) responsibilities relating to that portion of the Southern Nuclear Operating Company, Vogtle Electric Generating Plant (SNC-VEGP) Plume Exposure Emergency Planning Zone (EPZ) located within the Savannah River Site.

**II. AUTHORITIES & REFERENCES**

- A. Act 223, 1967 - South Carolina Atomic Energy and Radiation Control Act, as amended
- B. South Carolina Act Number 199, dated July 30, 1979
- C. SRS Emergency Plan, SCD-7
- D. DOE Region 3 RAP Response Plan, Q18 Vol. II
- E. Atomic Energy Act of 1954, as amended, 42 U.S.C. 2011-2284
- F. DOE O 151.1C, Comprehensive Emergency Management System, November 2, 2005
- G. National Response Framework, January 22, 2008

**III. AGREEMENT:**

In accordance with the authorities delineated in Paragraph II above, the parties agree to the following:

- A. DOE-SR will:
  - 1. Exercise overall responsibility, jurisdiction, and authority for conducting onsite response operations to protect the health and safety of SRS personnel (e.g., DOE and DOE contractor/subcontractor employees and official visitors) and property in the event of a VEGP incident to include the following:
    - a. Receiving incident notifications from SNC-VEGP;
    - b. Emergency notification of SRS personnel;

**ATTACHMENT J, SCORERP. MOU AMONG DOE-SAVANNAH RIVER OPERATIONS  
OFFICE, SCEMD, SCDHEC RE: VOGTLE ELECTRIC GENERATING PLANT** (continued)

- c. Coordination with SNC-VEGP concerning incident impact on SRS personnel or property;
  - d. Onsite radiological hazard assessment and implementation of appropriate protective actions to include shelter or evacuation of affected SRS Areas;
  - e. Monitoring and decontamination of SRS personnel when necessary;
  - f. Onsite radiological monitoring and assessment activities;
  - g. Onsite medical support except as indicated in Items III.A.2. and III.B.2. below;
  - h. Public information activities associated with VEGP incident impact on SRS personnel or property; and
  - i. Implementation of recovery and reentry operations.
2. Provide for emergency notification and as necessary, evacuation, monitoring, decontamination, and immediate life saving medical treatment of non-SRS personnel on site, to include the following:
    - a. The general public transiting SRS on SC Highway 125;
    - b. CSX Railroad employees on the SRS railroad right-of-way; and
    - c. Authorized hunters on SRS to include the Crackerneck area.
  3. Provide for access control for SRS areas affected by a VEGP incident, to include closure of SC Highway 125 and CSX Railroad right-of-way through SRS, when necessary to protect SRS personnel and public health and safety;
  4. Provide projected release dispersion information from SRS Weather Information and Display System (WINDS) calculations based on SNC-VEGP supplied source term data;
  5. Coordinate with the DOE Region 3 Radiological Assistance Program (RAP) Coordinator, as necessary, to ensure RAP provides offsite radiological monitoring and assessment support upon request of the State of South Carolina following declaration of an "Alert" or higher emergency classification at VEGP;
  6. Request the DOE Region 3 RAP Coordinator to provide advice to and coordinate support for the State of South Carolina regarding additional monitoring and assessment assistance available through the DOE/NNSA Radiological Emergency Response Assets.

**ATTACHMENT J, SCORERP. MOU AMONG DOE-SAVANNAH RIVER OPERATIONS  
OFFICE, SCEMD, SCDHEC RE: VOGTLE ELECTRIC GENERATING PLANT (continued)**

7. Coordinate, SRS radiological monitoring and assessment activities conducted within South Carolina, to include SRS, with the State of South Carolina and SNC-VEGP;
8. Coordinate to the extent practical, SRS public information activities relating to a VEGP incident with the State of South Carolina and, SNC VEGP;
9. Deploy appropriate DOE and DOE contractor personnel (SRS Liaison) to the State Emergency Operations Center, when activated, to facilitate communications and coordination in the event of a VEGP incident;
10. Maintain a twenty-four (24) hour capability for communications and coordination relating to a VEGP incident through the SRS Operations Center (SRSOC);
11. Ensure that appropriate emergency plans and procedures are in place to implement DOE responsibilities under this agreement;
12. Maintain a point of contact within the Savannah River Operations Office, for VEGP-emergency planning coordination with DHEC and SCEMD.

B. SCEMD and SCDHEC will:

1. Maintain a twenty-four (24)-hour capability for communications and coordination relating to a VEGP incident;
2. Coordinate the provision of necessary medical and other follow-up treatment for non-SRS personnel identified in Item III.A.2;
3. Maintain a point of contact within their respective organizations for VEGP emergency planning and coordination with DOE.

C. All parties agree:

1. To maintain: effective lines of communications and coordination in the event of a VEGP incident;
2. To review this agreement on an annual basis.

**IV. IMPLEMENTATION:**

- A. This MOU shall become effective upon the latter date of signature of the parties.
- B. The provisions of this Agreement are applicable only to DOE/State of South Carolina emergency planning and response coordination concerning a VEGP incident.

**ATTACHMENT J, SCORERP. MOU AMONG DOE-SAVANNAH RIVER OPERATIONS OFFICE, SCEMD, SCDHEC RE: VOGTLE ELECTRIC GENERATING PLANT** (continued)

C. This MOU supersedes a previous Memorandum dated June 7, 2007, among SCDHEC, SCEMD, and DOE-SR.

**V. AMMENDMENT / TERMINATION**

A. This MOU may be amended in writing by mutual consent of the parties concerned.

B. Termination of this MOU requires any of the parties giving thirty (30) days written notice to the other parties. Termination notices will be communicated through contacts established in this MOU.

**DE-MU09-92SR18275 OFFSITE NOTIFICATION AND INCIDENT CLASSIFICATION FOR THE SAVANNAH RIVER SITE**

**EXHIBIT 1  
OFFSITE NOTIFICATION AND INCIDENT CLASSIFICATION  
FOR THE SAVANNAH RIVER SITE**

1. **Operational Emergency:** An event that represents a significant degradation in the level of safety at a site/facility and requires time-urgent response efforts from outside the site/facility. Operational Emergencies are further classified as either an Alert, Site Area Emergency, or General Emergency, in order of increasing severity, when events occur that represent a specific threat to workers and the public due to the release or potential release of significant quantities of radiological and non-radiological hazardous materials.

**ALERT:** An ALERT is declared when events are predicted, in progress or have occurred that result in one or more of the following:

- An actual or potential substantial degradation in the level of control over hazardous materials (radiological and non-radiological) where the radiation dose from any release to the environment of radioactive material or a concentration in air of other hazardous material is expected to exceed the applicable Protective Action Criteria (PAC) at or beyond 30 meters from the point of release. The PAC is not expected to be exceeded at or beyond the facility boundary.
- An actual or potential substantial degradation in the level of safety or security of a nuclear weapon, component, or test device that would not pose an immediate threat to workers or the public.
- An actual or potential substantial degradation in the level of safety or security of a facility or process that could, with further degradation, produce a Site Area Emergency or General Emergency.

**SITE AREA EMERGENCY (SAE):** An SAE is declared when events are predicted, in progress, or have occurred that result in one or more of the following situations:

- An actual or potential major failure of functions necessary for the protection of workers or the public. The radiation dose from any release of radioactive material or concentration in air from any release of other hazardous material is expected to exceed the applicable PAC beyond the facility boundary. The PAC is not expected to be exceeded at or beyond the site boundary.
- An actual or potential threat to the integrity of a nuclear weapon, component, or test device that may adversely impact the health and safety of workers in the immediate area, but not the public.
- An actual or potential major degradation in the level of safety or security of a facility or process that could, with further degradation, produce a General Emergency.

**EXHIBIT 1 DE-MU09-92SR18275 OFFSITE NOTIFICATION AND INCIDENT CLASSIFICATION FOR THE SAVANNAH RIVER SITE (continued)**

GENERAL EMERGENCY (GE): A GE is declared when events are predicted, in progress, or have occurred that result in one or more of the following situations:

- Actual or imminent catastrophic reduction of facility safety or security systems with potential for the release of large quantities of hazardous materials (radiological or non-radiological) to the environment. The radiation dose from any release of radioactive material or a concentration in air from any release of other hazardous material is expected to exceed the applicable Protective Action Guide or Emergency Response Planning Guideline at or beyond the site boundary.
- Actual or likely catastrophic failures in safety or security systems threatening the integrity of a nuclear weapon, component, or test device that may adversely impact the health and safety of workers and the public.

2. **Courtesy Notifications:** An event or condition that does not fall within the Operational Emergency categorization and classification system but has the potential for significant public or media interest
